Session 4:
A Case Study: The Canadian Services Market and Canadian Services Trade Negotiations and Promotion

Canada-Indonesia
Trade and Private Sector Assistance Project (TPSA)

Trade in Services and Services Export Promotion Workshop

This programme has been made possible through the generous support of the Caribbean Export Development Agency and the Deutsche Gesellschaft für Internationale Zusammenarbeit (GIZ).
Session 4
A Case Study: The Canadian Services Market and Canadian Services Trade Negotiations and Promotion

- Overview of the Canadian Services Economy
- The Canadian Services Coalition: Its Role and Operation
- Canada's Participation in GATS and TiSA Negotiations
- Coordination and Consultations of Canada's Services Negotiations
- Canadian Service Export Promotion: Canadian Trade Commissioner Service
- Canada-Indonesia Bilateral Trade in Services: Opportunities and Challenges
The Importance of Services to the Canadian Economy

A critical and strategic dimension of the Canadian economy
72% of Canadian GDP, growing at 8%
75% of employment, 90% of new job creation
Canadian GDP by Industry

Source: Statistics Canada

- 72% Services
- 15% Manufacturing
- 6% Construction
- 5% Mining
- 2% Agriculture
Services: Canada’s Fastest Growing Exports

fastest growing inflation-adjusted Canadian exports; per cent change 2003-2013

- Finance and insurance services
- Agricultural products
- Management services
- Computer and information services
- Metals and minerals products

Canada a “Services Economy”
(inflation-adjusted GDP by sector; chained $2007 billions)

Emerging Markets Have Fastest-Growing Demand
(nominal US$ growth in commercial services imports, 2005–13; per cent change)

Sources: UNC TAD; The Conference Board of Canada.
Asia Big Growth in Services Demand

- Asia is 2nd largest (after Europe) and 2nd fastest growing (after Latin America) importer of services in world.
- Similar to N. America and Europe, vast majority of services are used as inputs in production chains.
- Personal presence: Canada tends to sell majority of services via foreign affiliates in Asia, not just via exports.
- Asia has fastest growing global stock of FDI in the world: $800 billion in 2001, but $2.5 trillion by 2012.
Japan, China Largest Consumers of High Value Service
(consumption of high-value business services, 2011, US$ trillions)

Sources: World Input-Output Database; The Conference Board of Canada.
Where Does Canada Sell its Services?

More than half of services exports are destined for U.S.

- Canada’s computer and info services have sizable market share in U.S. Imports (17%).

Canada less tapped into Asian markets

- Very few exports, AND
- Very small share of Canada’s Direct Investment Abroad

Asia is large and fast-growing

- China shifting to emphasis on services economy
- India needs infrastructure & related services
Europe’s High-Value Services Import Mix

(European imports of high-value services, 2013; percent share)

- Tech. and scientific: 26%
- Mgmt and prof.: 17%
- IP: 14%
- Computer and info: 13%
- Financial: 12%
- R&D: 9%
- Communications: 5%
- Insurance: 4%

Conference Board of Canada - Research Series on Services Trade

Spotlight on Services in Canada’s Global Commerce.

Good Service is Good Business.
How Services Add Value to Canadian Goods Exports

Becoming a Services Superpower.
Tapping into the Global Appetite for High-Value Services

Reports available on Conference Board of Canada website.
The Canadian Services Coalition (CSC)

Who we are:
The Canadian Services Coalition (CSC)

- Founded in 2006 and backed by the Canadian Chamber of Commerce.
- Provides a strong and cohesive voice to Canadian services industries.
- Promotes liberalization of services markets throughout the world and the removal of trade and investment barriers for the Canadian services sector.
- Updates our members on international negotiations and domestic developments pertaining to the services sector.
- Provides input to the Canadian government and international institutions on matters of international trade and investment for services in multilateral, bilateral and regional agreements.
Canada and Services Exports

- Importance of services to the Canadian economy: from 65% of GDP in 2000 to 70% of GDP in 2012; 78% Canadians employed in the services sectors.
- Canada is one of the largest services exporters in the world-ranking: 18th
- Cross-border exports of services were $83.3 billion; 15.3% of Canadian total exports; and the real contribution to Canada’s exports: 44%
- Foreign affiliates of Canadian companies sold $162 billion services abroad.
- USA is Canada’s major services export market: 53.4% (cf. goods: 73.2%). Other Canadian services markets are EU, China, Japan, Korea.
- Commercial services accounted for 60% of services exports, totalling 50 billion in 2012.

Sources: Statistics Canada; The Conference Board of Canada.
Canada’s Participation in GATS/TiSA Negotiations

- Canada has been actively participating in GATS/TiSA negotiations.
- Service negotiations were built-in agenda in the GATS, even before DDA in 2001.
- Canada launched the “Services 2000” to highlight the positions on various services negotiating issues.
- In March 2001, Canada submitted its initial proposals on GATS negotiations – the principles, objectives, negotiating guidelines and procedures, etc.
- Canada has made comprehensive commitments on services in many services sectors/sub-sectors – an open services economy.
- In the meantime, Canada has also reserved its right to limit some services sectors for foreign competition – for example, health, education, culture and social services, etc.
Consultations with Canadians on GATS/TiSA Negotiations

- From 2001 to 2013, Canada constantly revised and improved services offers in GATS/DDA negotiations, for example, professional services (legal, accounting, auditing, bookkeeping, engineering; temporary movement of business people, transport services, financial services, commercial presence, courier service, etc).

- Canada conducts full consultations on trade negotiations, including GATS/TiSA:
  - Background or position papers
  - Trade Negotiations Consultations Unit
  - Official notices, public consultations with the business sectors and general public, respond to inputs/submissions
  - Key WTO/GATS/TiSA negotiations, e.g. the WTO Ministerial Conferences
Canada’s Participation in TiSA Negotiations

- TiSA negotiations under the WTO, started in March 2013 with 21 WTO members, including Canada.
- Now TiSA includes 25 WTO members, representing about 2/3 of the world economy, exporting $3.6 trillion in services in 2013.
- 15 rounds of negotiations took place, and 5 more rounds planned for 2016. The negotiators intend to conclude the TiSA negotiations by the end of this year.
- TiSA parties will revise their offers in May and finish the legal text in July.
- More advanced text in TiSA include: e-commerce, localization, telecoms, financial services, and movement of nature persons, etc. – Wikileaks.
- TiSA will lead major changes to Canadian banking, telecom, data privacy etc: for example, Canada needs to change foreign ownership in telecoms; TiSA eliminates government monopolies in postal services; TiSA also proposes to bar governments from having requirements to store data locally – privacy issue.
Canada’s Participation in TiSA Negotiations

- Government of Canada also conducts consultations on TiSA negotiations with Canadian stakeholders – however, less information available to the public
  - Interested parties are invited to contribute views and advise:
    1. identify service export opportunities and barriers in those markets
    2. identify barriers to temporary entry and stay of business persons
    3. identify investment barriers (ownerships, performance requirements, transparency of regulations and other impediments)
  - Business associations (for example, Canadian Coalition of Services Industries) are positive and providing inputs to government negotiators
  - Also received many critical comments: weak transparency, secret negotiations, damage to Canadian public interests, etc.
  - The negotiations and arguments on TiSA are continuing
Canadian Trade Commissioner Service

Created in 1894
Network of more than 1,000 trade professionals
150 cities around the world and every province and territory of Canada

Four key services:

- Assessing Canadian companies’ potential in the targeted markets
- Preparing Canadian companies for international markets
- Market Intelligence and finding qualified contacts for Canadian traders and investors
- Assisting in resolving problems and challenges for Canadian companies
Canadian TCS and the Promotion of Canadian Service Exports

Services free-of-charge to promote Canadian exports and Canadian investment abroad

- Market intelligence reports and studies - education, health, ICT, financial services, telecoms, professional services, etc
- Business contacts for potential trade and investment opportunities
- Joint venture or strategic alliance with target markets
- Technology and R&D partnerships in the host countries
- Trade and investment fairs/shows
- Trade and investment relations (including services) between Canada and host countries

- Canada enjoyed about $100 million trade surplus of services trade with Indonesia
- Canada exported $79 million (travel services) and $71 million (commercial services) to Indonesia; Indonesia exported $34 million (travel) and $8 million (commercial) to Canada.
- In 2012, the stock of Canada’s FDI in Indonesia was $3.2 billion while Indonesia invested in Canada at 2 million in the same year. Many Canadian investments in Indonesia are in the service sectors (for example, Manulife, Sunlife, some ICT, mining and engineering companies).

There are challenges and opportunities for the bilateral trade in services – what can be done, particularly for the promotion of Indonesia’s services exports?
Canada-Indonesia Bilateral Trade in Services: Challenges and Opportunities

- Indonesia’s services sectors are less competitive but with huge potential.
- Indonesia needs to open some services sectors for foreign competition in order to increase their efficiency, competitiveness and export potential.
- Strategic thinking and practical approaches needed to increase services exports:
  - Strong political will to realize/increase the services export potential
  - Coordination and consultations among ministries/agencies and private sector
  - Review of the negative list of investment to improve the investment climate
  - Build the basic infrastructure for services sectoral development
  - Formulate services development strategies and roadmaps for priority sectors
  - Provide training for some professionals and negotiate MRAs with other countries
  - Negotiate better services provisions in GATS/FTAs negotiations, potentially TPP, CEPA, etc
  - Strengthen Trade Attachés and IETC on services – more staff needed
  - Improve the overall quality and standards of services (tourism, health, education, e-commerce, ICT and other professional and business services, etc.)
Do you now better understand the Canadian Practices on Services?

What was the most interesting thing you have learned from this module?

Next steps?
